TITLE : OPTICAL MODULE

ABSTRACT : PROBLEM TO BE SOLVED: To minimize the circuit connection of an optical element unit of an optical module to a circuit substrate unit.

SOLUTION: An optical module comprises optical element units 51 projected on lead terminals 66-69, and a circuit substrate 75 for connection which is provided on the inner side of module cases 91 where an end face for the connection of the optical element unit 51 is brought into contact with and fitted to the outer side of the module case 91, and the optical element unit 51 is connected to a circuit substrate unit 95 through the circuit substrate 75 for connection.
